

Stone Group Laboratories
Gemstone Identification and Origin Report

December 12, 2019

Report #191204A-DGW

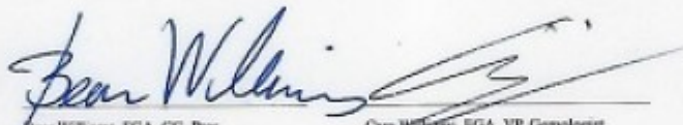

The gemstone below has been examined with the following result:

Species:	Corundum
Variety:	Sapphire
Cut:	Oval
Size:	13.69 x 11.75 x 9.60 mm
Color:	Violetish Blue

Lab Comments: *Indications of thermal enhancement. The heating of corundum is a common and stable industry practice. It is the opinion of this lab that the country of origin is Ceylon (Sri Lanka).*

The purpose of this identification report is to provide additional gemological information. It represents the opinion of Stone Group Labs, LLC at the time of testing. SGL takes no responsibility for the condition of the gemstone after the time of testing.

Peter Williams, FGA, CG, Pres. Cara Williams, FGA, VP, Gemologist
