Comments:

Document No: 1123147 Validation Date: 23 May 2022

Identification

Mineral Type: Natural Andradite Garnet Transparency: Transparent

Variety: Demantoid Color Description: Green

Carat Weight: 4.02 cts Shape: Oval

Measurements: 10.27 x 7.59 x 6.81 mm Cutting Style: Modified Brilliant Cut

Comments:

Identification

Origin

Provenance: Russia (Ural Mountains)

Comments: Based on available gemological information, it is the opinion of the Laboratory that the origin of this material would be classified as Russia (Ural Mountains).

Origin

Enhancement

Standard: See comments Additional: Clarity enhancement: None

Stability Index: Color Stability: Excellent

Enhancement

Comments: The color of demantoid may be modified through a relatively low temperature heating process. To date, it is not possible to make a definitive determination as to whether this stone is natural color or heated in this manner.
