Document No: 1144937

Validation Date: 11 December 2024

Identification

Mineral Type: Natural Tourmaline  
Variety: Paraiba

Transparency: Transparent  
Color Description: Blue

Carat Weight: Stated by Client 23.50 cts  
Measurements: Approx. 16.43 x 15.99 x 11.44 mm

Shape: Square Cushion  
Cutting Style: Modified Brilliant Cut

Comments: Set in a white and rose metal pendant with numerous round, pear and marquise diamonds (identified at random). Paraiba is a trade term/color variety applied by the AGL to the copper-bearing variety of elbaite tourmaline, which was first discovered in the Paraiba state of Brazil.

Origin

Provenance: Brazil

Comments: Based on available gemological information, it is the opinion of the Laboratory that the origin of this material would be classified as Brazil.

Enhancement

Standard: No gemological evidence of heat

Additional: Clarity enhancement: None

Comments: Non-heated paraiba is scarce. The color of paraiba is commonly the result of a relatively low temperature heating process.
