

**GEMSTONE REPORT**

EDELSTEINBERICHT  
RAPPORT DE PIERRE PRÉCIEUSE

No. GRS2018-020970  
Date 12th February 2018  
Object One faceted gemstone  
Identification Natural Pinkish-Orange Sapphire  
"Natural Padparadscha"

**Origin**

Gemmological testing revealed characteristics corresponding to those of a natural pinkish-orange sapphire from:

Sri Lanka

Weight 18.06 ct  
Dimensions 17.13 x 14.11 x 8.65 (mm)  
Cut modified brilliant/step (5)  
Shape oval  
Color pinkish-orange  
Comment No indication of thermal treatment

magnification 1.5x

**Gemstone Report No. 91373**

Weight: 18.066 ct  
Shape & cut: oval, modified brilliant / step cut  
Measurements: 17.16 x 14.08 x 8.68 mm  
Colour: pinkish orange  
Identification: **PADPARADSCHA**  
(variety of natural corundum)  
Comments: The analysed properties confirm the authenticity  
of this transparent padparadscha.  
No indications of heating.  
Origin: Ceylon (Sri Lanka)

**Important Note:** The conclusions on this Gemstone Report reflect our findings at the time it is issued. A gemstone could be modified and/or enhanced at any time. Therefore, the SSEF can at any time reassess if a stone is in accordance with the Gemstone Report. Only the report with the valid original signatures, embossed stamp and Proof Tag™ label affixed on to the surface of the laminated report is a valid document. PDF scans and copies of a Gemstone Report are not legally binding. **Appendix letter No. 91373**

**Exceptional Padparadscha**

The natural padparadscha described in Gemstone Report No. 91373 from the Swiss Gemmological Institute SSEF possesses extraordinary characteristics and merits special mention and appreciation.

The described padparadscha exhibits a remarkable size and weight of 18.066 ct, combined with an attractive pinkish orange colour and a very fine purity.

The few inclusions found by microscopic examination represent the hallmarks of padparadschas from the classical gem deposits in Ceylon (Sri Lanka), also known as the 'Island of Gems'. Its subtle pinkish orange colour is due to a combination of well-balanced trace elements in the gemstone, typical and characteristic for the finest padparadschas of Ceylon.

The name of this gem variety originates from the Singhalese (Sanskrit) *padma raga* (*padma* = lotus, *raga* = colour), which is truly a poetically comparison, referring the beauty of this gem with the colour hues of lotus flowers.

In addition to above mentioned qualities, this padparadscha has been spared exposure to heat treatment and its clarity and colour are thus all natural.

A natural padparadscha from Ceylon of this size and quality can be considered rare and exceptional.
