Document No: 1123567 A and B      Validation Date: 17 June 2022

Identification  
 Mineral Type: Natural Beryl      Transparency: Transparent  
 Variety: Emerald      Color Description: Green

Carat Weight: 10.19 and 9.72 cts      Shape: Pear  
 Measurements: 19.47 x 11.34 x 6.93 mm      Cutting Style: Mixed Cut  
 and 19.30 x 10.97 x 6.83 mm

Comments: Two gemstones with a total weight of 19.91 cts.

Origin  
 Provenance: Colombia

Comments: Based on available gemological information, it is the opinion of the Laboratory that the origin of this material would be classified as Colombia.

Enhancement  
 Standard: Clarity      Additional: None  
 Degree: Minor  
 Type: Traditional  
 Stability Index: Very Good to Good

Comments: Emeralds are commonly clarity enhanced to reduce the visibility of fissures. Traditional materials used to clarity enhance gemstones include various oils (such as Cedarwood oil) and waxes (Paraffin), as well as others.

American Gemological Laboratories  
 America's first and largest gemological laboratory  
 AGL is an independent, non-profit testing facility  
 AGL is the first laboratory to be accredited by the International Organization of Standardization (ISO) for gemological testing  
 Country-of-Origin (COO) testing is available for all gemstones  
 principals have been established for the detection of synthetic and class-impure gemstones  
 Our staff of gemologists and technicians use the most advanced methodology procedures and reliable equipment to ensure the highest quality of service and the most accurate results
